

Microsoft 365 Copilot

Acceptable Use Policy — Terms of Use

Organisation	_____
Department	_____
Full Name	_____
Job Title	_____
Date	_____

1. Purpose

This Acceptable Use Policy governs the use of Microsoft 365 Copilot ("Copilot") within the organisation. Copilot is an AI-powered assistant that can access emails, documents, meetings, chats, and SharePoint content. Because of this broad access profile, all users must understand and comply with the obligations set out in this policy before using Copilot.

2. Scope

This policy applies to all employees, contractors, and authorised third parties who have been granted a Microsoft 365 Copilot licence. Use of Copilot constitutes acceptance of this policy.

3. Permitted Use

You may use Copilot to:

- Summarise, draft, and improve documents, emails, and presentations.
- Analyse data and generate reports based on content you are authorised to access.
- Search for information across content you have legitimate permission to view.
- Automate repetitive tasks within the boundaries of your role.

4. Prohibited Use

You must not use Copilot to:

- Input, process, or generate content containing personal data beyond what is necessary for your role.
- Access, retrieve, or share content you are not authorised to view under normal circumstances.
- Circumvent data classification, sensitivity labels, or DLP controls.
- Generate content that is discriminatory, offensive, misleading, or in violation of applicable law.
- Share AI-generated output externally without first reviewing it for accuracy and appropriateness.
- Use Copilot as a substitute for professional, legal, medical, or financial advice.

5. Data Handling Obligations

- Do not enter confidential or sensitive data into Copilot prompts unless the relevant SharePoint site is on the organisation's approved Copilot allow-list.
- Always review AI-generated content before sharing it internally or externally. You are responsible for the accuracy of content you send.
- If Copilot surfaces information that you would not normally have access to, stop immediately and report this to your IT administrator.
- Do not attempt to use Copilot to extract, compile, or export bulk data from organisational systems.

6. Security Requirements

Access to Copilot is governed by Conditional Access policies enforced by the IT department. You must: (a) complete multi-factor authentication each time you access Copilot; (b) access Copilot only from a device that meets the organisation's device compliance requirements; and (c) accept this Terms of Use before accessing Copilot for the first time.

7. Monitoring and Audit

The organisation may monitor Copilot interactions for compliance with this policy, applicable law, and data governance obligations. Interaction logs may be retained for audit, eDiscovery, or legal hold purposes in accordance with the organisation's retention policy.

8. Consequences of Violation

Violation of this policy may result in suspension or revocation of Copilot access, disciplinary action up to and including termination of employment or contract, and referral to law enforcement where applicable.

9. Acknowledgement

By accepting this Terms of Use you confirm that you have read, understood, and agree to comply with this Acceptable Use Policy. Your acceptance is recorded with a timestamp in the organisation's audit log.
